November 2006, score: 734

Work Experience

○ March 2025 - Up until today: Freelance
Position: Web Developer
Projects: MiTaller
I'm developing a multi-tenant SaaS (Software-as-a-Service) solution that streamlines customer management, vehicle tracking, service history logging with visual evidence, and invoicing for service-based companies. All in one place.
MVC Architecture, SCRUM, HTML5, CSS3, TailwindCSS, Javascript (ES6), Typescript, Postman, REST API, Jason Web Token, Visual Studio Code, GIT, Angular 20 (Standalone, Signals, RXResource, Lazy Loading, Attach Debugging, etc.), Nest JS (Dtos, Decorators, Pipes, Swagger, Attach Debugging, etc), PostgreSQL (Schemas, Migrations, etc.)

○ January 2022 – February 2025: Flow Media | Vivaro.com/media
Position: Web Developer
Projects: Flow.
I have developed a web application to manage all the live events, and to be able to make your broadcasts efficiently, involving suppliers and consumers, supported by real-time notifications.
MVC Architecture, SCRUM, HTML5, CSS3, Primevue, Javascript (ES6), Typescript, NUXT 3 (Vue JS), NodeJS, Express, JSON, JWT, REST API, Web Sockets, MongoDB, Visual Studio Code, Postman, GIT.

○ January 2020 – December 2021: Su Karne | Sukarne.com
Position: Web Developer
Projects: Audits, HR - Reward, Work Pending
I have developed a web application, it is an audit control with notifications and messages in real time, other web application to HR to track positive and negative actions of staff, and more one to keep control of the pending tasks between boss and collaborator.
MVC Architecture, SCRUM, HTML5, CSS3, Bootstrap, Javascript (ES6), Typescript, Angular 10, NodeJS, Express, JSON, JWT, REST API, Web Sockets, Oracle, SQL Server, MongoDB, Visual Studio Code, Postman, GIT, Tortoise.

○ November 2018 – January 2020: Spyral Systems/Primus Labs. | Primuslabs.com
Position: Web Developer
Projects: NAS (New Azzule System), ESB (Enterprise Service Bus).
The company offers analysis services to preserve the food security of crop producers.
Visual Studio .Net 2017, ASP .Net core 2.1, C#, MVC Architecture, SCRUM, HTML5, CSS3, Element, Javascript (ES6), VueJS, NodeJS, WebPack, Babel, JSON, REST API, Web Sockets, JWT, SQL Server, Visual Studio Code, Insomnia, Postman, GIT, Tortoise.

○ February 2017 – September 2018: Salud Digna | Salud-digna.org
Position: Web Developer
Projects: HIS (Hospital Integral System).
The company offers preventive and diagnostic health services for the general public.
Visual Studio .Net 2017, ASP .Net Core 2.1, C#, MVC Architecture, SCRUM, Entity Framework, HTML, CSS3, Materialize, Javascript (ES6), Typescript, NodeJS, Express, JSON, REST API, Web Sockets, JWT, SQL Server, MongoDB, Mongoose, Robo 3T (Robo Mongo), Visual Studio Code, Insomnia, Postman, TFS.

○ January 2007 – December 2016: Dafi SC | dafi.com.mx
Position: Web Developer
Projects: Scf2 (Sistema de control de fideicomisos – "Trust Control System"), Jubicom (Jubilación Complementaria – "Complementary Retirement"), PFN (Pago Fuera de Nómina – "Off-Payroll Payment"), UDEP (Unidades De Participación – "Participation Units"), Préstamos Magisteriales ("Teachers Loans"), GFD (Gastos Funerarios de Dependientes – "Dependent Funeral Expenses").
The Company offers financial services like investments, loans, life insurance, funeral expenses, savings banks, and anothers services, especially to some unionized people.
