PROFESSIONAL PROFILE

Senior Software Engineer with 18+ years of experience designing and building production software, enterprise applications, and SaaS platforms. Strong background in full-stack engineering, backend architecture, data modeling, and business-critical systems.

Specialized in TypeScript, Node.js, NestJS, Angular, and PostgreSQL, with hands-on experience designing REST APIs, multi-tenant architectures, transactional workflows, and SQL/NoSQL database solutions.

Currently building and leading the development of a cloud-ready, multi-tenant B2B SaaS platform, including AI-powered automation. Experienced in using AI-assisted development tools such as Cursor, ChatGPT, and GitHub Copilot for implementation, debugging, testing, refactoring, and technical exploration, while maintaining ownership of code quality, security, architecture, and production readiness.

Proven track record of measurable impact, including 70% faster deployments, up to 85% database performance improvements, 50% reduction in system response times, and real-time platforms supporting 500+ concurrent users.

TECHNICAL SKILLS

Languages: TypeScript • JavaScript (ES6+) • SQL • C#

Frontend: Angular (v2–v20) • RxJS • Vue 2/3 • Nuxt 3 • TailwindCSS • PrimeVue • Angular Material • Bootstrap • HTML5 • CSS3

Backend: Node.js • NestJS • Express.js • REST API Design • TypeORM • JWT • WebSockets • Swagger • DTO Validation • Dependency Injection • ASP.NET Core • Entity Framework Core

Databases: PostgreSQL • SQL Server • MongoDB • Oracle • MySQL

AI & Automation: AI-Assisted Development • Cursor • ChatGPT • GitHub Copilot • Google Gemini API • Google Cloud Vision API • Prompt Engineering • OCR • Voice-to-Text Workflows

Engineering: Software Architecture • Multi-Tenant SaaS • Data Modeling • Transactional Systems • Performance Optimization • CI/CD • Code Review • Agile/Scrum

Tools: Git • GitHub • Postman • Insomnia • Visual Studio Code • Swagger • TFS

WORK EXPERIENCE

Freelance | multiservicios247.com

Senior Software Engineer | Mar 2025 – Present

Designed and architected a cloud-ready, multi-tenant B2B SaaS platform for automotive service businesses, owning the solution end-to-end from database and backend architecture to frontend development and production deployment.

- Designed tenant-isolated PostgreSQL architecture and scalable tenant provisioning using NestJS, TypeScript, and TypeORM.
- Built core transactional workflows including customers, vehicles, work orders, inventory, invoicing, expenses, and payroll.
- Implemented secure authentication and role-based authorization using JWT.
- Automated CI/CD deployment, reducing deployment time by **70%**.
- Integrated Google Gemini for AI-powered structured data extraction and Google Cloud Vision for OCR-based workflows.
- Use AI-assisted development tools such as Cursor, ChatGPT, and GitHub Copilot for implementation, debugging, testing, and documentation, while reviewing generated code for correctness, security, and maintainability.

Tech Stack: Angular 20 • TypeScript • NestJS • Node.js • PostgreSQL • TypeORM • REST APIs • JWT • Google Gemini • Google Cloud Vision

Flow Media | Vivaro.com/media

Senior Frontend Developer | Jan 2022 – Feb 2025

Developed the frontend of a real-time live event management platform for international sports and entertainment events, including Olympic and World Cup-related events.

- Designed and developed reusable UI components and application workflows using Nuxt 3, Vue 3, and PrimeVue.
- Designed MongoDB views to efficiently retrieve and structure data required by the application.
- Proposed and helped implement WebSocket-based real-time communication for event notifications and system updates.
- Optimized MongoDB queries and views, improving application performance.

- Reduced event configuration time by **40%**.
- Contributed to a platform designed to support **500+ concurrent users**.

Tech Stack: Nuxt 3 • Vue 3 • PrimeVue • Node.js • Express • MongoDB • WebSockets • JWT

SuKarne | Sukarne.com

Senior Full Stack Developer | Jan 2020 – Dec 2021

Led the development and modernization of enterprise applications, combining hands-on software engineering, technical leadership, and end-to-end project ownership.

- Designed and developed an internal auditing and performance management system from the ground up, working directly with business users to define requirements and the solution.
- Designed a daily data ingestion process that transformed corporate data into store-level snapshots used for performance metrics and audit workflows across stores nationwide.
- Built dashboards and business metrics that enabled auditors to identify performance gaps and prioritize audits.
- Led a small development team of two engineers while contributing directly to architecture, development, and delivery.
- Contributed to modernization efforts for a large enterprise application, reducing technical debt by approximately **30%**.
- Implemented real-time notifications using WebSockets.

Tech Stack: Angular 10 • Node.js • Express • SQL Server • MongoDB • WebSockets • JWT

Primus Labs | Primuslabs.com

Full Stack Developer | Nov 2018 – Jan 2020

- Developed enterprise applications for financial services within the agricultural industry.
- Improved SQL Server query performance from **14 seconds to 2 seconds**.
- Designed REST APIs secured with JWT authentication.
- Contributed to backend architecture using ASP.NET Core.

Tech Stack: Vue 2 • .NET Core 2.1 • C# • SQL Server • JWT • WebSockets

Salud Digna | Salud-digna.org

Full Stack Developer | Feb 2017 – Sep 2018

- Developed hospital information systems supporting diagnostic and preventive healthcare operations.
- Integrated MongoDB for medical images and electronic records.
- Reduced consultation response times by **50%**.

- Implemented WebSocket-based real-time notifications.

Tech Stack: .NET Core 2.1 • SQL Server • MongoDB • TypeScript • WebSockets

Dafi SC | dafi.com.mx

Full Stack Developer | Jan 2007 – Dec 2016

Developed and maintained mission-critical financial systems for banking and investment institutions during a 10-year tenure.

- Trust Management System
- Retirement Fund Administration
- Payroll Payment Platform
- Investment Unit Management
- Loan Management
- Funeral Benefits Administration

Tech Stack: .NET • C# • SQL Server • JavaScript • jQuery

EDUCATION

Computer Science

Universidad Autónoma de Sinaloa (UAS) | 2003 – 2008

MICROSOFT CERTIFICATIONS

- Programming in HTML5 with JavaScript and CSS3 — 2013
- Administering Microsoft SQL Server 2012 Databases — 2013
- TS: Microsoft .NET Framework 2.0 – Web-Based Client Development — 2009
- TS: Microsoft .NET Framework – Application Development Foundation — 2009
- Developing and Implementing Web Applications with Microsoft Visual C# .NET and Microsoft Visual Studio .NET — 2006

LANGUAGES

Spanish: Native

English: Professional Working Proficiency (B2 / Upper Intermediate)
